

Ice Hockey Victoria

Concussion Referral and "Return to Play" Form

In the event a player has been removed from play due to a suspected concussion, the Concussion Referral and Return form must be completed as specified by IHV.

Sections 1 – 3 must be provided to the club's secretary and IHV Medical Information Officer (via email to medical@ihv.org.au) before training and playing resumes. Failure to complete any section of this form will result in a player being excluded from training and playing.

Section 1 – Player Details

Team official (manager, coach, medic) to complete at the time of the day of the injury, before presenting to the medical doctor reviewing the player.

Player Name:		
Date of Birth:	/ /	
Club: Competition:

Section 2 – Initial Consultation

IHV takes concussion seriously and its default position is that all players who are suspected of, or have suffered, a concussion must be treated as having suffered concussion.

The player has been informed that they must be referred to a medical doctor. Your role as a medical doctor is to assess the player and guide their progress over the remaining steps in the process.

The IHV Concussion Policy and Graduated Return to Play Protocol is available in full at www.ihv.org.au

Please note, any player who has been diagnosed showing signs and symptoms of concussion MUST follow the Graduated Return to Play (GRTP) protocol.

Adults aged 19 years and over	Children and adolescents aged 18 years and under
The minimum period before return to play is 12 days	The minimum period before return to play is 19 days

I have assessed the player and read and understood the information provided about the incident in this form. I have provided a summary of my assessment in a written document attached.

Section 3 – Clearance Approval

Players name:

Today and based upon the evidence presented to me by them and their parent / guardian, and upon my history and physical examination, I can confirm:

- I have reviewed Section 1 of this form, and specifically the mechanism of injury and subsequent signs and symptoms
- The player has undertaken the age specific mandatory rest period
- The player has completed steps 2,3,4 of the IHV Return to Play process without reoccurring symptoms
- The player has returned to school, study, work normally and has no symptoms related to this

I can also confirm I have read all relevant information in IHV's Concussion Policy at www.ihv.com.au.

Following medical assessment, and completion of the above steps, I therefore approve that this player may return to full contact training (Stage 5 of the Graduated Return to Play) and if they complete this stage successfully without the reoccurrence of symptoms, the player may return to playing Ice Hockey.
